

Google Forms - Form response submitted

How my AI agent works

Instant trigger

1  New response for  Untitled form  is submitted

2  Prompt GPT-4.1

3  Write row to  reviews · Sheet1 

A • positive review

B • negative review

4 If 2. Review contains "positive"

Trigger

Form response submitted

Start when a new Google Form response is submitted.

Form response submitted

Form *

Untitled form

Optional filters

Only trigger runs that meet these conditions

Add filter

Step 2

Prompt GPT-4.1

Use AI to analyze and classify the review as positive, negative, or neutral.

Prompt GPT-4.1

Prompt

Give the model detailed instructions. Insert relevant data for context.

[See examples](#)

you are data analytics expert read the reviews from

1 Form response user review classify the reviews in an positive ,negative or neutral

#examples

review :the product was very bad.its quality is cheap

output:negative

review :the product was very good.its quality is perfect

output:positive

review :the product was ok ok.its quality is appropriate

output:neutral

AI has access to: 1 Form response

Step 3

Write row

Log the review and its classification into a Google Sheet.

Write row

Sheet *

reviews · Sheet1
